INTRODUCTION

The main goal for this project being developed by a small indie company, akin to something like amazon and other online shopping websites, is to deliver a web-based information system focused on the cataloging and selling of books, shoes, Knick knacks and any other similarly sorted items and collectables. As such, we intend to have any number of users be able to access the catalogs for any of those items, check their availability and if they're so incline to, buy any number of said items.

LOGIN

Login and Register pages here built on the foundations provided by the professors.

The screenshot shows the ATGO website's login page. The header is dark blue with the ATGO logo and navigation links: Products, Cart, Wishlist, and Login. A search bar is on the right. The main content area is light gray and features a white login form with a blue border. The form has a title 'Login' in blue. It includes an 'E-mail Address' field with the placeholder 'jes@mail.com', a note 'We'll never share your email with anyone else.', a 'Password' field with masked characters, a 'Recover Password' link, a blue 'Login' button, and a link 'Don't have an account? Sign Up'.

MAIN PAGE

The main page of our website presents all the products available to be purchased. This provides a good way for the costumer to browse and explore beyond what he intends to buy.

If the costumer prefers to browse just one of the categories of products provided by our website, he can quickly pick the one he wants from the drop-down menu.

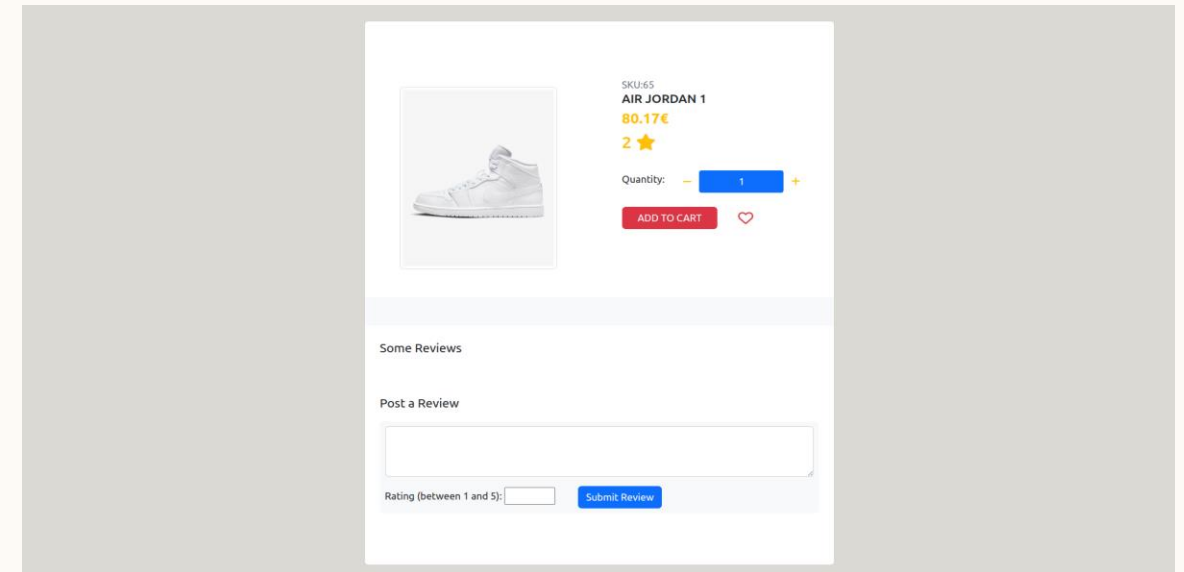

PRODUCT

When the user clicks on an item he is redirected to a page where he can view all the information the website has on the product itself.

He can also check reviews that were given by other users that own the product to gain a better insight on the product.

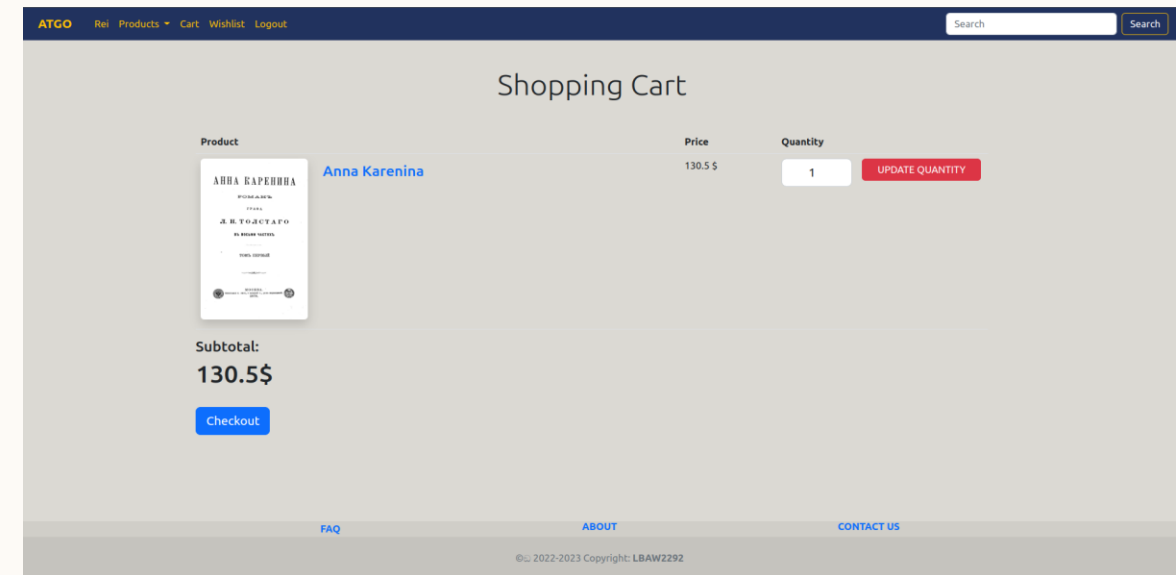

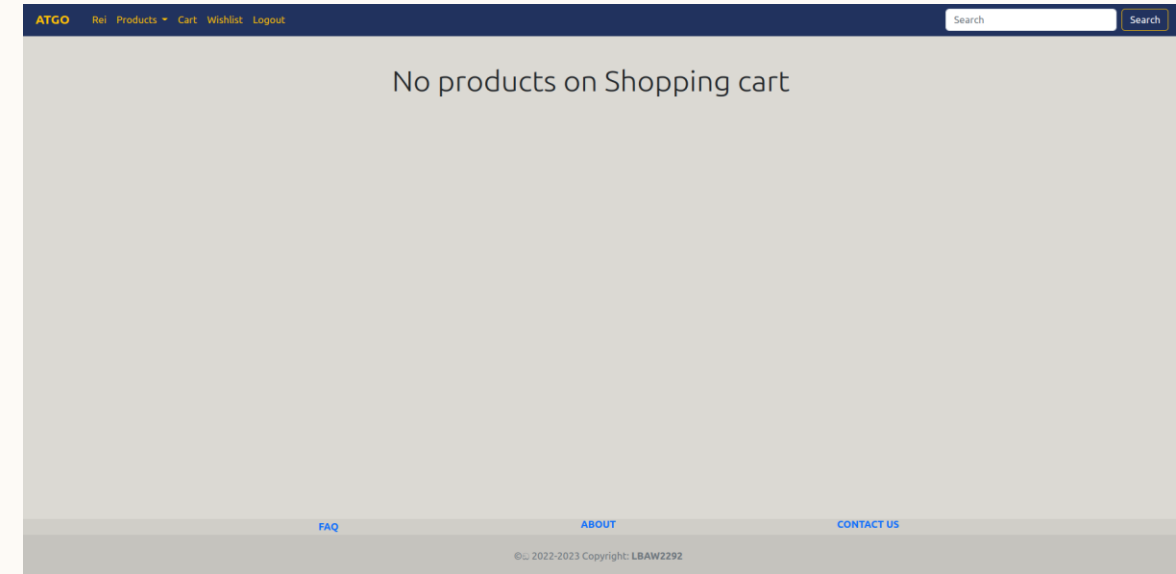

CART

When no items are added to the cart the website warns you if you try to checkout.

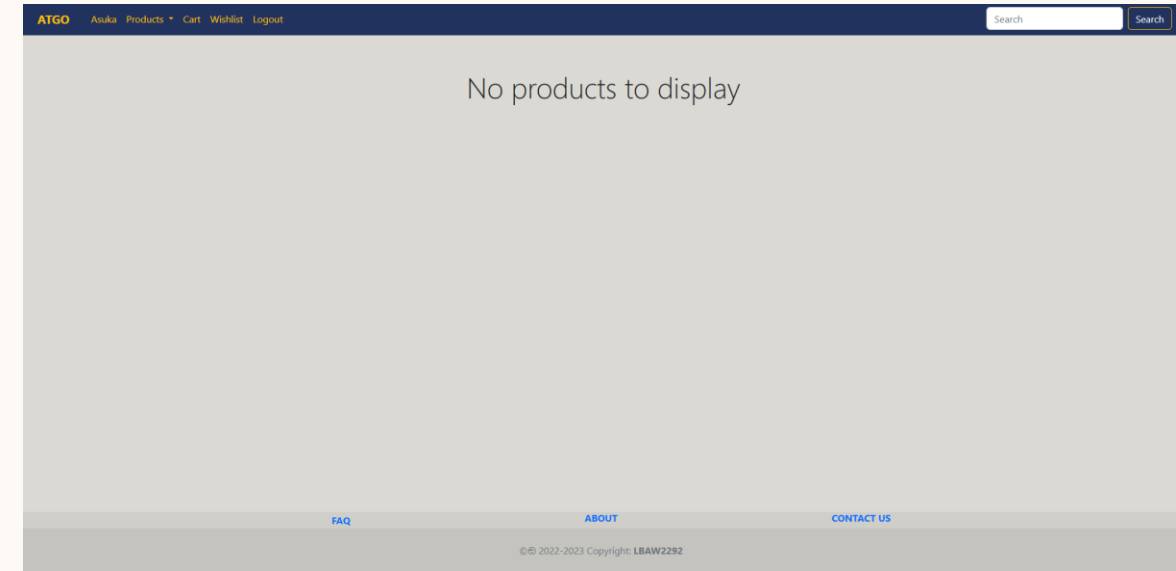

To add products to the cart the user must own an account on the website, afterwards he can observe the items and preview the total price he will pay for the items. He can also change the quantity of each item he has on his cart to meet his liking.

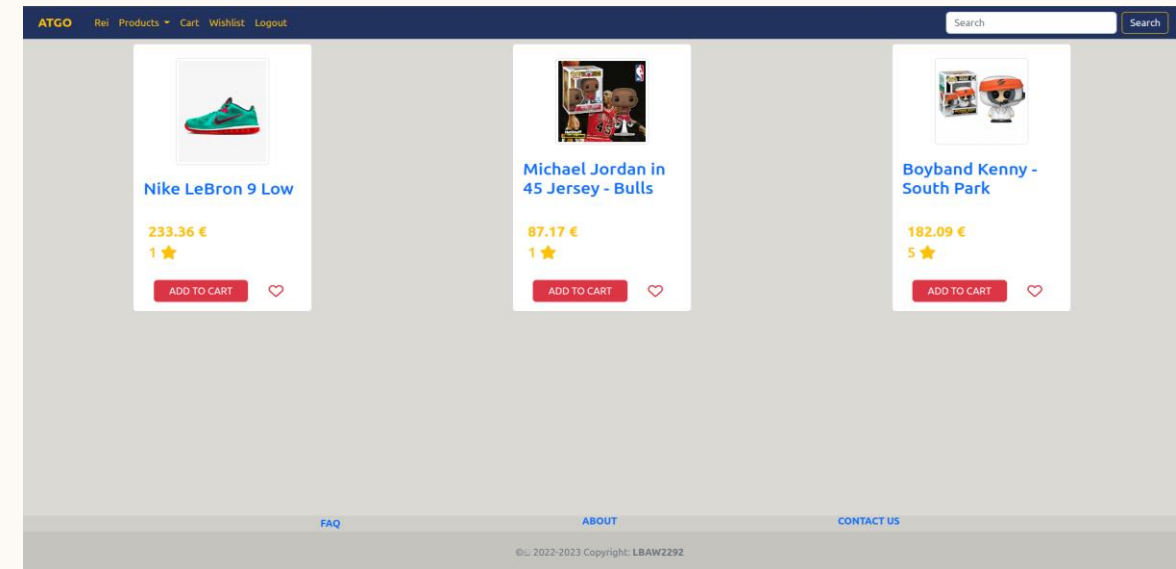

WISHLIST

To add products to the wishlist the user must own an account on the website, when no items are in wishlist the website warns the user.

To add items the user previously selected the heart icon in a product. When he selects the wishlist button he is redirected to a page where all his selected items are prompted.

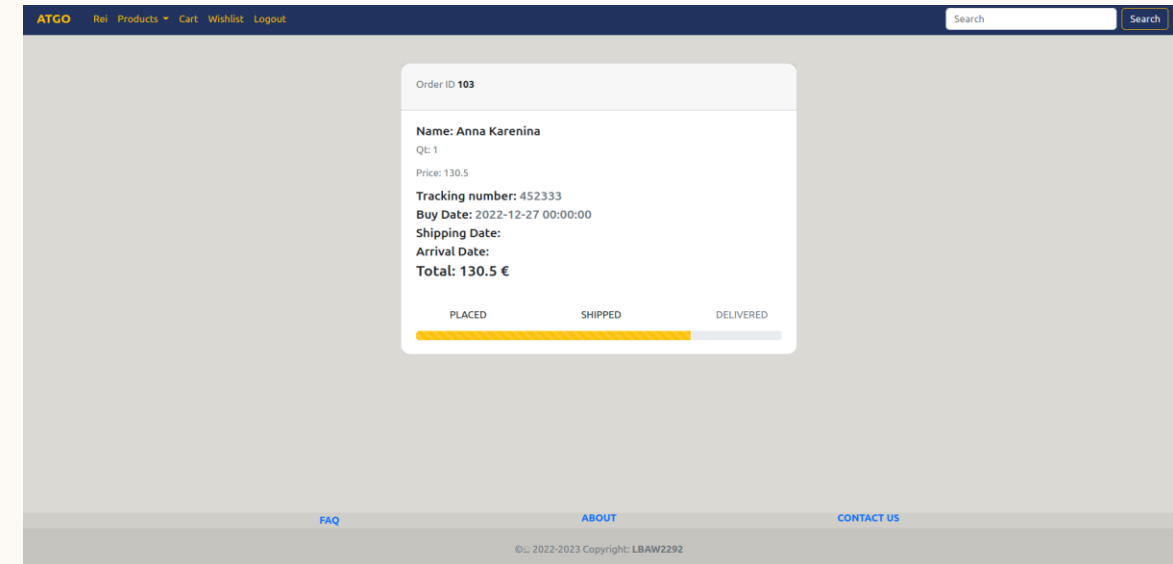

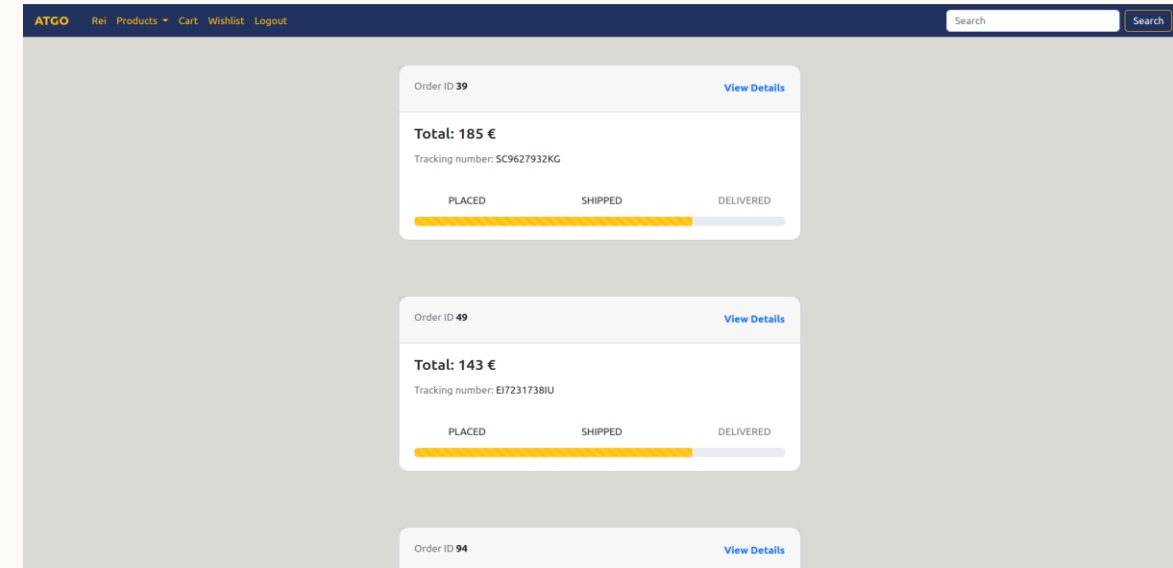

ORDERS

When the user has made some purchases in our website, he will be able to view all the orders when pressing a button on his user page. There he can view his orders and the status of them.

When the user selects the button 'View Details' he is prompted to a page where he can see more details of the specific order.

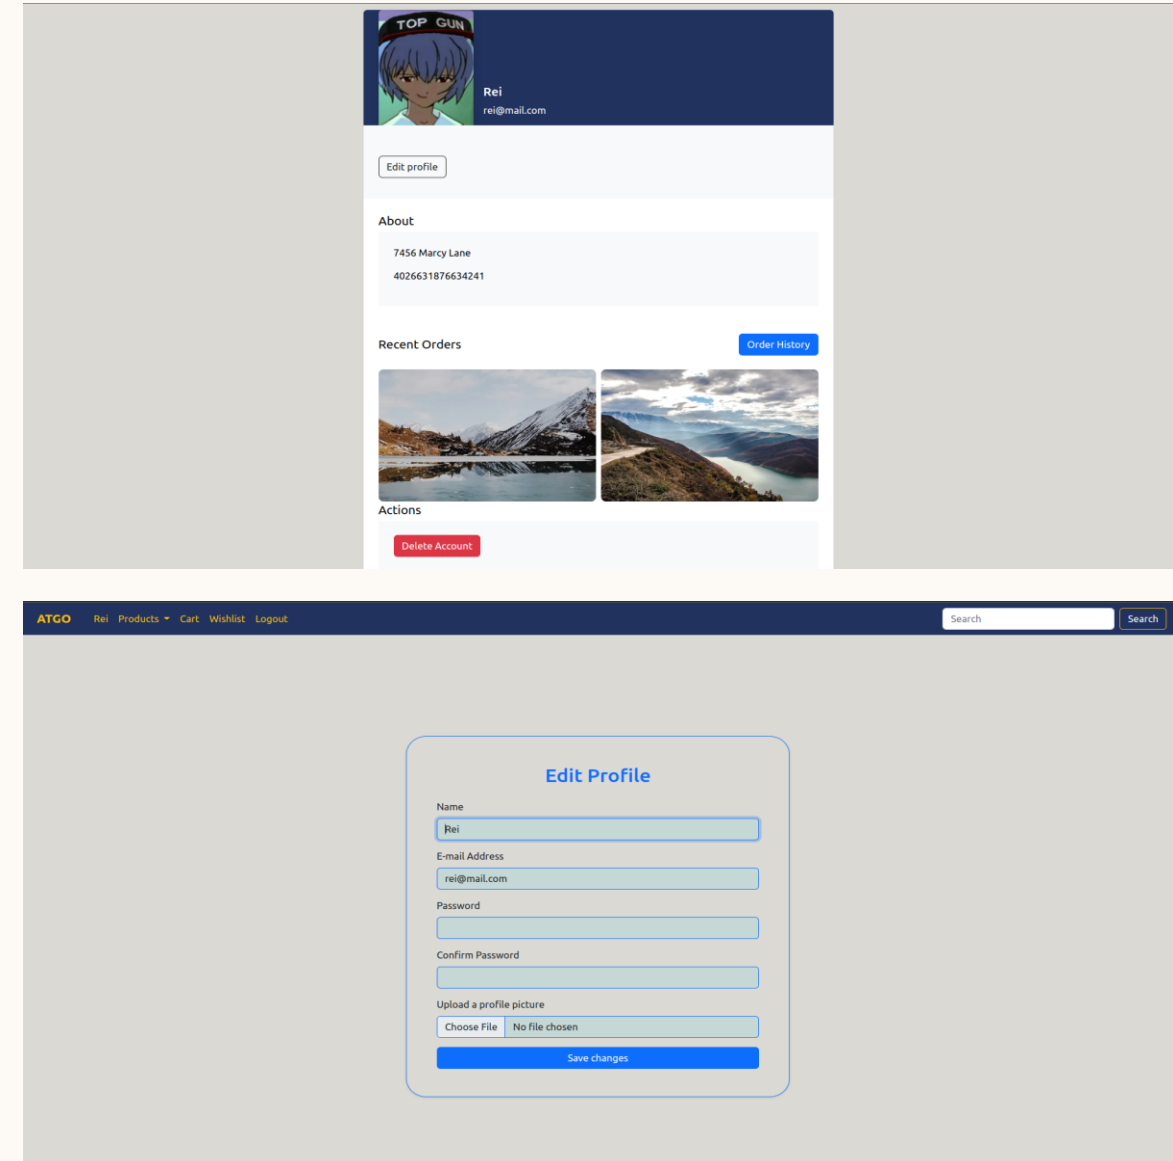

USER

If the user decided to create an account, he can view it by pressing his own name in the nav bar, this will redirect him to a page where he can see all the information that he provided to the website to check if its correct.

In the event that any information is incorrect the user can update it in the edit form.

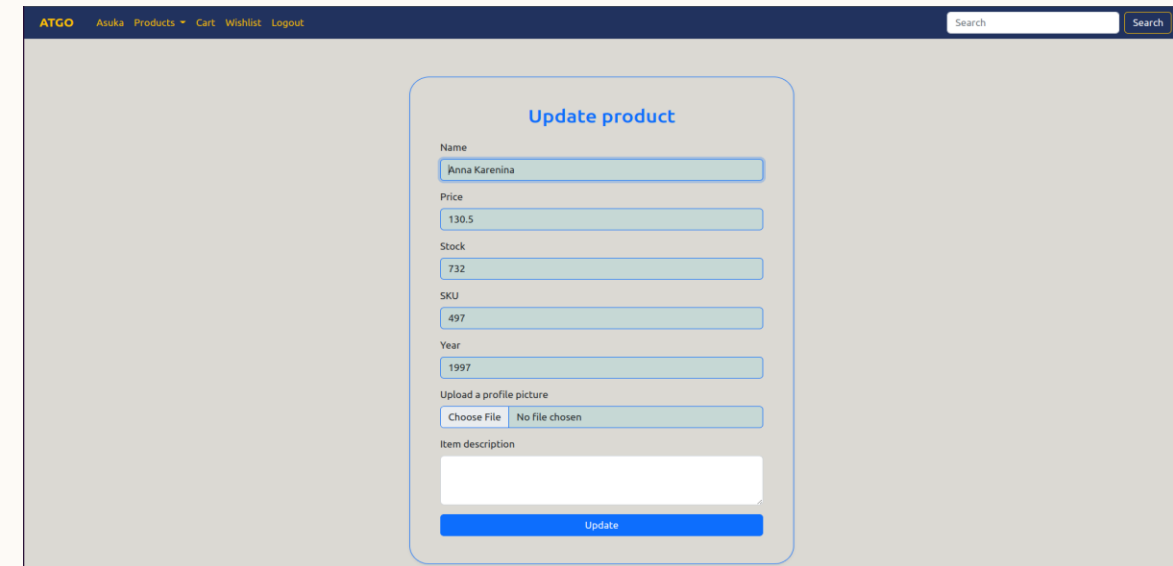

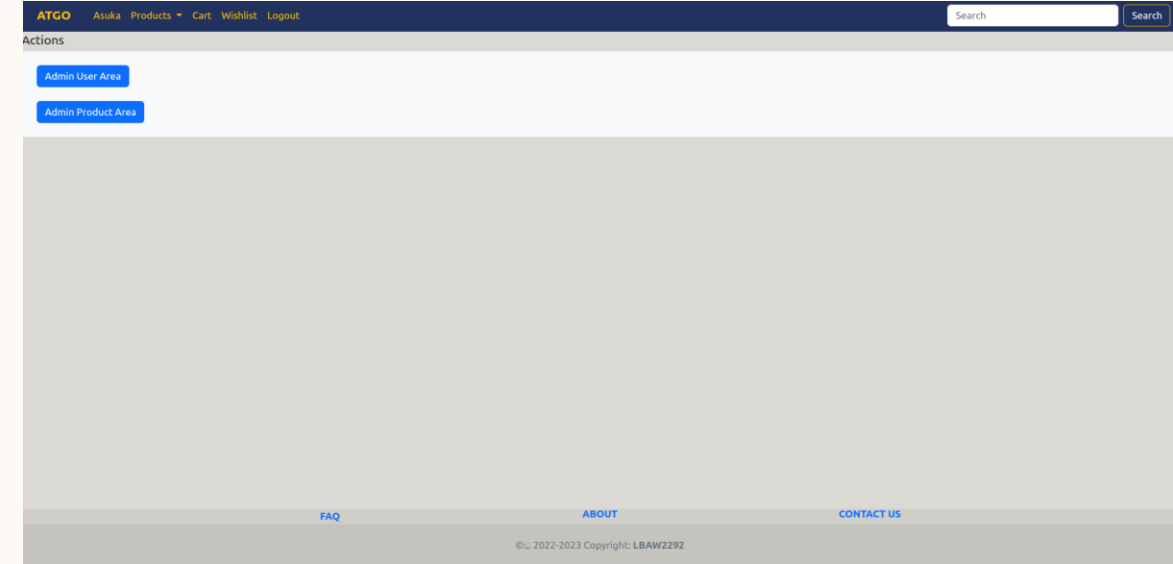

ADMIN

If the account the user owns is an administrator role, besides not being able to checkout any order he also has some other special properties, such as the ability to ban users for bad behavior or add new products.

As an example, the administrator can alter information of products if it is incorrect through the proper form.

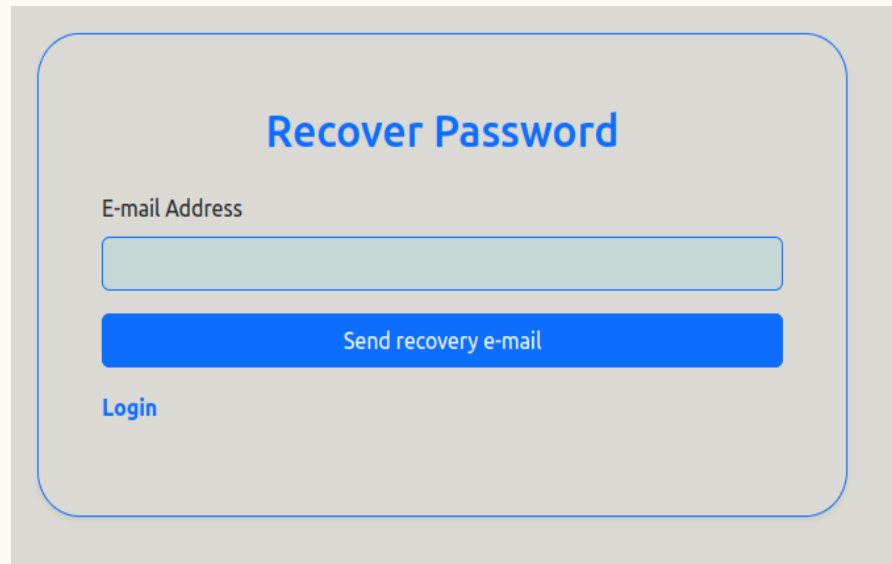

PASSWORD RECOVERY

If a user forgets his password, he can simply ask the website to recover it by giving the email he uses on the website.

After a short time, he will receive an e-mail that allows for him to reset the password to one he will hopefully remember.

ATGO

Hello!

You are receiving this email because we received a password reset request for your account.

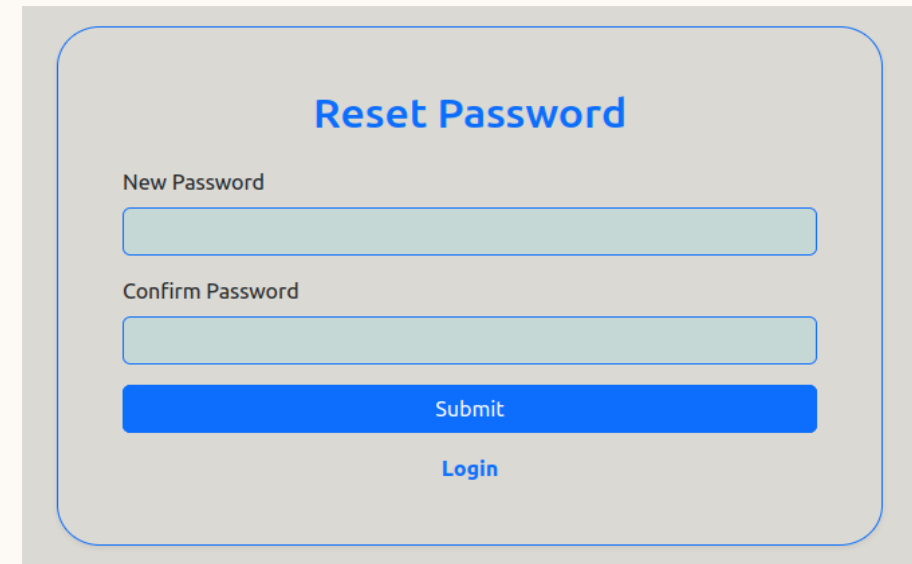

Reset Password

This password reset link will expire in 60 minutes.

If you did not request a password reset, no further action is required.

Regards,
ATGO

If you're having trouble clicking the "Reset Password" button, copy and paste the URL below into your web browser: <http://localhost:8000/password/reset/edddd3c0f3741d1f8598eea3948855b6f96ff8c102183bf5987ac09b4d10ab4e?email=asuka%40mail.com>
